Visit a windmill

The 10 big windmills regularly turn and/or mill. If the flag is flying, blowing and the wicks turn, you are welcome.

During the „Nationale Molendag„ (National Windmill-day) in the 2nd weekend of May, the „Groninger molenweekend„ (Groninger windmill-weekend) in the 2nd weekend of July and the „Open Monumentendag„ (Open Monumentday) in the 2nd weekend of September all mills will turn on Saturday or Sunday. Other days on which mills will turn are posted on the website of our windmill foundation.

The windmill foundation is set tot receive fewer subsidies and therefore seeks finance through donors and sponsors.

Donor and sponsors will receive a text message which describes the activities of the windmill foundation. The windmill foundation also has an ANBI status, meaning donations can be used as tax deductions.

New volunteers can apply for various activities at the foundation and will receive a warm welcome.

Molenstichting
Midden- en Oost-Groningen

In the middle of Groningen our foundation manages twelve historic windmills. They are all pictured in this folder.

Our millers, windmill guides, windmill friends and board members cooperate in order to preserve this cultural heritage for you and our children, in a friendly and professional environment. For this cause we created a flat, effective organisational structure. In addition to our board we have supporting committees, each with its own specialism: technology, communication, activities and finances.

The foundation manages its own website—and publishes a magazine for sponsors and donators every 6 months called 'het SMSje'. We train people in the miller profession at the training windmill of the Groote Polder in Slochteren.

Every year more than 3000 visitors visit our windmills: tourists, students from schools, fellow millers, mill guides and other interested. We are striving to increase this number. For this cause we can use your help: as volunteer.
